Jefferson Fernandes

Senior Software Engineer

São Paulo, Brazil · offjeff91@gmail.com · linkedin.com/in/jeffersonfernandes91

Summary

Senior Software Engineer with ten years of backend experience in Ruby on Rails and PostgreSQL, plus data engineering pipelines on AWS and Hadoop. Worked remotely for Canadian companies, and mentors engineers on code standards and reviews.

Experience

Senior Software Engineer (100% remote) Jul 2022 – present
ElectionBuddy Alberta, Canada
Stack: Ruby on Rails, PostgreSQL, AWS, Redis

- **Voter platform and integrations**
  - Integration with the HOA API.
  - Voter import into PostgreSQL.
  - Result restriction by plan and billing, which drove upgrades to higher tiers.
- **Quorum features**
- **Platform upkeep**
  - Ruby upgrade and code standards.
  - PostgreSQL database maintenance and internal scripts.
  - Took the app from MVP to production on AWS.
- **UI revamp**
- **Team and ownership**
  - Code reviews for junior developers.
  - Owner of my projects, from planning through delivery.

Senior Software Engineer (100% remote) May 2022 – Jun 2023
TridentAB (by SmartFlowLabs) Quebec, Canada

- **Shopify A/B testing** React, Node.js, Shopify, MongoDB
  - A/B tests for Shopify merchants' products.
  - React visual editor that lets shoppers change store elements.
- **Scheduling integration** Node.js
  - Integrated the scheduling system with an external queue API.
- **CI/CD and deployment** Heroku
  - Pipeline from GitHub to Heroku. Deployed and maintained a MongoDB cluster.
- Product management tasks.

Tech Lead (remote) Jun 2020 – Jul 2021
Vizir Software Studio São Paulo, Brazil

- Code reviews, mentoring, task prioritization with project managers, and onboarding new engineers.

Senior Software Engineer Oct 2014 – May 2020
Vizir Software Studio São Paulo, Brazil

- **Data pipeline and analytics platform (Abril Big Data)** Ruby on Rails, PostgreSQL, Amazon S3, AWS Data Pipeline, Elasticsearch, Hadoop, Apache Pig
  - Designed and deployed the ETL pipeline from S3 files into Elasticsearch on AWS Data Pipeline.
  - Batch processing with Hadoop MapReduce, written in Apache Pig.
  - Built the Rails web app for complex queries over the processed data.
- **Document validation (CargoX)** Ruby on Rails, Vue.js, AWS, Terraform

  - Integrated the app with an OCR API to speed up document validation.
  - Moved the cloud infrastructure to AWS with Terraform.
- **Marketplace microservice (JCPM)** React, Node.js, AWS Lambda, Terraform
  - Marketplace platform for retailers across e-commerce platforms.
  - Microservice on AWS Lambda, managed with Terraform.
- **Lead-capture quiz (Jornal do Comércio)** Ruby on Rails, AngularJS
  - Interactive quiz that collects customer lead data.

Software Engineer Mar 2014 – Oct 2014
VTX Software São Paulo, Brazil

- Maintained the Node.js API for a mobile wallet product.

Software Engineer Mar 2011 – Mar 2014
Vizir Software Studio São Paulo, Brazil

- First professional web work, mainly with Ruby on Rails and jQuery.

Software Engineer Mar 2010 – Oct 2011
i9Tec São Paulo, Brazil

- Microsoft Dynamics AX solutions. MCP certification in X++. SQL Server and C#.

Junior Software Engineer Oct 2008 – Mar 2010
RMS Software LTDA São Paulo, Brazil

- ERP software. Integrated the product with a government tax system over SOAP. .NET and SQL Server.

Technologies

Ruby on Rails, PostgreSQL, AWS, Redis, Terraform, Elasticsearch, Hadoop, Apache Pig, AWS Data Pipeline, React, Node.js, Vue.js, AngularJS, MongoDB, Heroku, Shopify, CI/CD, SQL Server, C#, .NET.

Education

Bachelor's degree, Computer Information Systems Mar 2010 – Dec 2014
Universidade de São Paulo (USP). Extracurricular: organized tech events on campus and taught an introduction to Ruby on Rails twice.

Languages

English (fluent), Spanish (fluent), Portuguese (native).
